

PRIVATE CLIENT SERVICES

At Marsh Private Client Services (PCS) our mission is simple: to help financially successful individuals and families protect their properties and their lifestyles by providing expert personal insurance consultation, solutions, and services.

Marsh PCS has been a pioneer in personal insurance advisory services since our beginnings in 1980. We realized then that the standard approach followed by most insurance companies does not take into account the unique risks facing those with wealth, so we built our business by individually customizing personal insurance programs for each of our clients.

I invite you to learn more about what Marsh PCS can do for you and then reach out to us to get started on the path toward greater financial security. You deserve true peace of mind.

WHAT WE DO

Personal Risk Analysis

We start with a thorough analysis of your unique risk profile and insurance needs. This is an essential first step in providing you individually customized advice, recommendations, and solutions. We analyze your exposure to risk based on your assets and lifestyle and also review your existing insurance program and policies to determine coverage adequacy.

Customized Advice and Recommendations

Based on what we learn during your personal risk analysis, a Marsh Personal Risk Advisor will provide specific options and recommendations for strengthening your insurance program. Our advice will be based not only on your own personal circumstances but on our years of experience helping protect successful individuals and families. We also provide access to loss mitigation techniques to help protect your property, valuables, and assets.

Insurance Brokering

We then find solutions for you from among the nation's insurance companies specializing in protecting families and individuals with more complex risks. We work to customize their coverages to meet your needs, obtain competitive options, and provide you with recommendations and guidance to help you choose the appropriate solutions for you.

Insurance Program Management

It's only to be expected that your life and financial circumstances change over time. As they do, your risk profile and personal insurance needs also tend to change. We provide ongoing management of your personal insurance program through responsive policy update services as well as periodic reviews of your overall risk profile and insurance program.

Claims Advocacy

If you should ever suffer a loss, a member of our team of dedicated Marsh PCS Claims Advocates will be available to file a claim with your insurance company on your behalf. Your claims advocate will also provide support and guidance throughout the entire claims settlement process.
